SA4: DNS and DNSSEC / Huque	Exceeded Expectations	Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Exceeded Expectations	The amount of information that Mr. Huque was able to squeeze into this class was amazing. His class was very well done.	More comfortable chairs.
SA4: DNS and DNSSEC / Huque	Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Greatly Exceeded Expectations	Met Expectations	The instructor was able to explain the concepts behind and implementation of DNS and DNSSEC very clearly.	I'd like to see examples of some of the procedures described in the course materials -- actually using command-line tools to set up a key signing key, sample zone file, zone signing keys, and so on. Huque did an amazing job of explaining the topics, but I'd still think I would have benefited from seeing the process. I confess that I don't know quite where he could have fit such a demonstration.
